

GOOGLE MAPPING API – UPDATE BILLING INFO

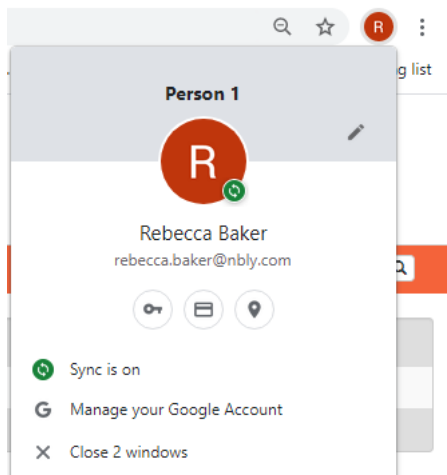

If your map stops working in SmartWare, chances are that your credit card info has expired for your Google API Billing account. The amount of usage always falls below the level at which any actual billing would occur, however, a current credit card is still required to be attached to a billing account for the API Credentials in your Google Console.

You may have gotten email notifications from Google to let you know that your billing account is about to expire.

If this happens, follow the instructions below to update your credit card information.

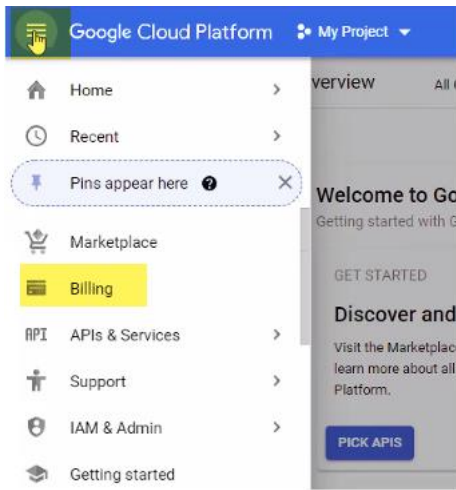

1. Log into your Google account on Chrome.

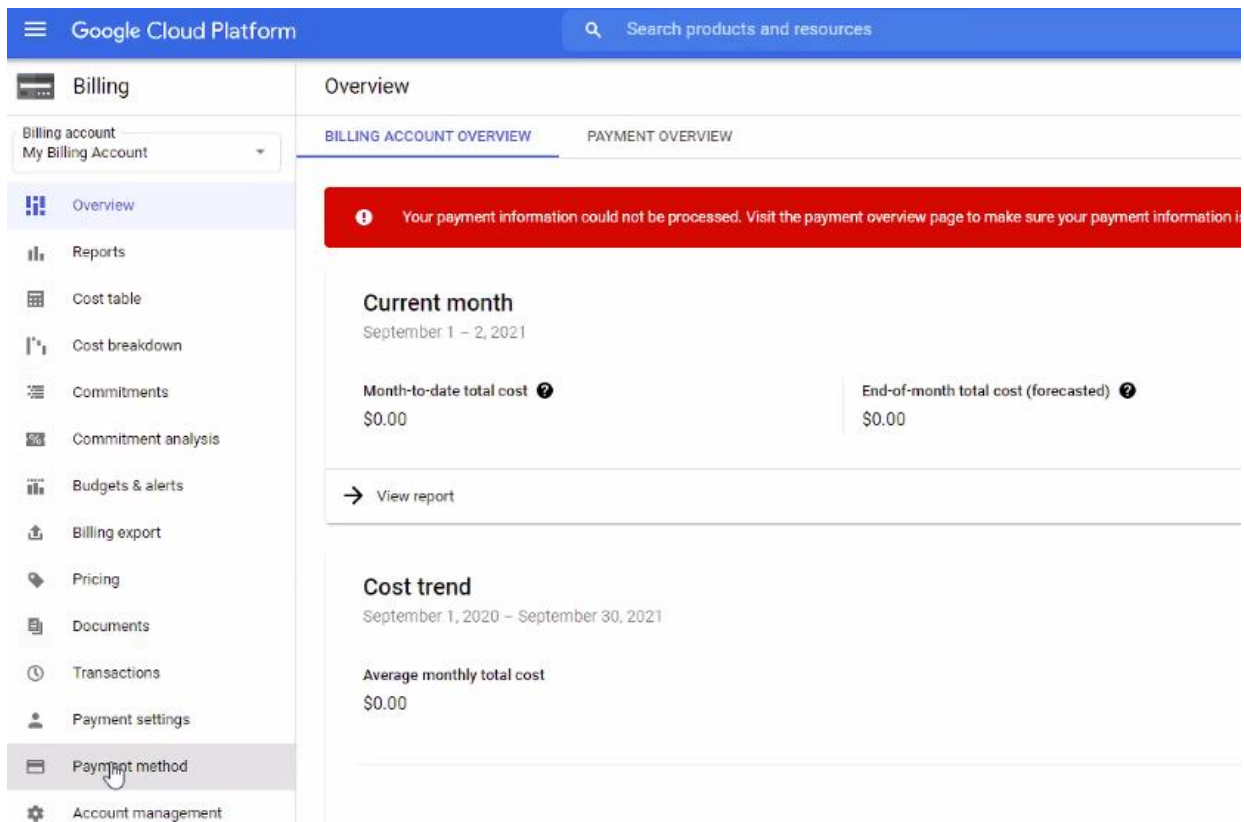

2. Click on this link: <https://cloud.google.com/maps-platform/?apis=maps,routes,places>
3. Click on Console.

- Click on the Menu Options by the Google Cloud Platform heading and select Billing

- Select Payment method

- Update Payment info
